

RollMatic TDL

The cost-effective roller garage door version with tubular drive

The RollMatic TDL roller garage door creates more room in front of and inside the garage. It is available in stylish Traffic white RAL 9016 or elegant Anthracite grey RAL 7016 (shown). We also offer two Decopaint surface finishes: Golden oak, which gives a natural timber look, and Noir 2100 Sablé, which provides a modern sleek finish.

The space advantage: the door construction incl. standard curtain cover requires very limited fitting space.

The convenience advantage: the tubular operator with emergency crank handle as standard is conveniently operated via a hand transmitter with rolling code radio 433 MHz.

The safety advantage: an opto-sensor in the floor seal offers reliable protection. It monitors the closing edge acc. to DIN EN 13241-1.

Harmonious overall appearance

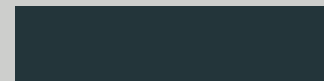

The exterior of the RollMatic TDL rolling shutter is distinguished by a balanced clear look. This is primarily due to the evenly ribbed profiles. For a matching overall appearance the curtain cover and guide rails are also delivered in the colour and finish of the door.

Overview of benefits

- particularly space-saving tubular operator with emergency manual gear
- compact door design with only 290 mm required headroom and only 75 mm sideroom.
- trouble-free to maintain curtain cover as standard
- control incl. 2 hand transmitters RSC with rolling code radio 433 MHz
- safety acc. to DIN EN 13241-1 through closing edge safety device with optosensors
- standard emergency crank handle for opening the door in case of a power failure
- quiet door travel through track rollers
- handy belt system for the easy fitting of the curtain to the barrel
- Size range:
Width (LB): 1200 – 3050 mm
Height (LH): 1500 – 2300 mm
